JOINT VENTURE

Through the Years

The First Year

This was a time of excitement and change. We all were happy to finally get started on the long, hard road to becoming a P.T. . During this time we made new friends, partied, and even found time to study.

The Second Year

A time of transition.

It was the hardest time of all. The long road appeared to get shorter but the end still seemed miles away. We were given tons of new information but we weren't sure exactly what to do with it all.

The Third Year

The end and a new beginning.

The light can now clearly be seen at the end of the tunnel. At this time we have all grown and matured into competent professionals. We look back at the last three years, take a deep breath and say to ourselves, "I guess it wasn't that bad, but I would never want to go through it again."

AND NOW WE ENTER THE
FUTURE ...

CLASS OF 1990 YEARBOOK DEDICATION

by Kathy De Risi

... Dreams, goals, ambition, and high expectations are just some of the thoughts we remember experiencing as we entered Touro's PT Program back in '87. Little did we know that time would go by so fast and these, once thoughts, are now becoming a reality. We have worked hard to accomplish the goal of becoming Physical Therapists, we've dreamt of being in a field that is fast becoming well known and so desperately needed, and we've hopefully reached so many high expectations that it's time to wish them upon those who will follow in our path.

As graduating students we know how much hard work and valuable time goes into a program such as ours. You must always keep in mind that we have all had an active part in making this program what it is today and that your hard work and dedication will in the end be the most rewarding and self satisfying conquest you've ever decided to take upon. This is why we dedicate this yearbook to our fellow classmates and those in the years to follow who will endure as we step out into a new beginning. We hope you will continue to strive for the best that you can be in such a dynamic field as Physical Therapy.

JOSEPH WEISBERG, P.T., Ph.D.
DEAN

1990

Dear Graduates:

As I look back over the past three years I must commend you for your understanding and cooperation. It was during your stay at Touro that we had to move the program to another location. This move caused many administrative difficulties which affected you. Nevertheless, you maintained your enthusiasm and dedication which helped us to overcome many of the difficulties and to ensure success.

We, the faculty and administration of the Program, feel that we have provided you with a strong and sound educational background that should enable you to grow and assume leadership positions within the field of physical therapy. In return, we have received your dedication and friendship.

I trust that this is not a good-bye. My door has always been open to you and will remain so with the expectation that we can maintain and nurture the relationship we started at Touro.

We wish success to all of you, and we look forward to your active participation in the newly established Physical Therapy Alumni Association.

Sincerely,

Joseph Weisberg, P.T., Ph.D.

Introducing

PHYSICAL THERAPY

"To nurture a being . . . both body and soul."
To nurture a being,
both body and soul;
to heal with the touch of a hand,
whether by a firm massage,
or simply by the love contained in a gentle caress;
to carry along a soothing peace,
that would calm even the most debilitating fear;
to seek out that which is good in every person;
and to use that good to bring back a lost breath of life;
to restore faith to a life that has been torn and tattered;
to bring new hope to those who,
without you,
would come to view hope as nothing more than a memory;
to have your very being warmed at the sight,
of a child's smile,
because you know,
with all your heart,
that it was you that helped that smile emerge,
along with some tiny,
but very significant steps,
from a set of frail,
underdeveloped legs;
. . . this is to have become . . .
A Physical Therapist ! ! !

THE JOINT REPORT

VOL. 1, NO. 3

NOV./DEC. 1989

This newspaper is produced by the students of Touro College.

VOLUNTEERING FOR AN ADVENTURE

by Joe Hayes (Class of 1991)

On a cool, overcast Sunday morning in November, over 23,000 people did not have breakfast in bed, did not read the Sunday Times, and did not even sleep late. Where were all of these people? What were they all doing? And, most importantly, why were they not sleeping late on a Sunday? Simply stated, they were awaiting the start of a 26 mile, 385 yard adventure.

The adventure, better known as the 1989 New York City Marathon, began in Staten Island, continued through Brooklyn then into Queens at the 13-mile mark, then into Manhattan via the Queensborough Bridge, a quick hello to the Bronx, then back into Manhattan, into Central Park, out of Central Park, onto Central Park South, then back into the Park for the exhausting finish. The adventurers, better known as long distance runners, showed common problems including blisters, cramps and physical as well as mental fatigue through the race. In addition

'91) and KEN EATO ('92). As students in the health field, we were appropriately assigned to the Medical Corp. team. Included in our realm of treatment were triage areas and the chutes at the finish line. Responsibilities included locating runners that required medical attention, walking with disoriented runners, evaluating the injured, deciding which medical tent was indicated and carrying runners that could no longer support themselves.

Touro was also represented by mobilization professor Dr. Barak and physiology professor Dr. Barry. Dr. Barak is active in the New York Road Runners Club and is one of the senior staff members in charge of organizing the NYC Marathon. Dr. Barry participated in a somewhat different manner. He ran in the marathon. Did he say "Ran in the marathon?" Yes, he said "Ran in the marathon." Dr. Barry finished the first 18 miles in approximately 4

Re: PHYSICALS

Date: 12/4/89

I would like to inform you that the original copy of your physical has been located.

At my request, the Physical Therapy Program phoned those students whose physicals were not located in order to extend to you the courtesy of knowing what the situation was and to allow you the time to submit a copy of the physical.

I regret any negative consequences and inconveniences that arose as a result of the situation. If you do not have a copy of the physical, please see VALERIE COOPER-WILLIAMS.

Remembering . . .

Three years have past us full of test anxiety and fears;
Yet now that its over we still shed some tears.

Our time has come to lay our books down to rest;
To go into life, beginning our quest.

We've studied, worked hard and had good times together;
These are among the memories that will last forever.

There were many times when things were rough;
The exams, the move—enough was enough!

And when within the class friendships formed and divided;
When problems arose we took a stand—all united.

Upon leaving these memories behind some may feel a loss;
Wondering if our paths will ever cross.

The time has come for all of us to say;
Good luck as we part our own separate way.

Tears that still shed are not those of stress and frustration;
They are tears of pride and joy, felt by each of us at graduation.

Love always, Azriel

Dear Mom & Dad,

Your support and encouragement has kept me strong throughout the difficult times of this program. Your undying belief in me has always been the key fiber that makes me truly believe in myself. You have been not only parents to me, but good friends. I love you with all my heart, for I am your son, but I also say with sincerity, I like you as people. You have taught me valuable lessons throughout life. My education has taught me a great deal as well. I will graduate soon and venture into the world with all this wonderful knowledge. I intend to use my knowledge wisely, pass it on to the next generation and hope it strongly helps those in need. I thank you for all you have done for me. Your guidance is responsible for the many paths I have chosen, which has undoubtedly led to my current accomplishments.

Love, Kevin

**The Difference
 Between
 Finishing And Being Finished.**

Whether you play strictly for fun or are serious about athletics, there is always the risk of injury. Some are very minor and will heal with a proper amount of rest. However, other injuries require a rigorous program of therapy to restore your body to peak playing condition. Trouble is, most of us cannot tell the difference between a minor injury and one that could permanently threaten our ability to participate if left untreated. Sports Medicine professionals can.

To The Graduating Class of 1990:

*If you think you are beaten, you are;
If you think you dare not, you don't
If you'd like to win but think you can't
It's almost a cinch you won't.*

*If you think you'll lose, you've lost
For out of the world we find,
Success begins with a fellow's will
It's all in the state of mind.*

*Life battles don't always go
To stronger or faster man;
But sooner or later the man who wins,
Is the one who thinks he can.*
